

# How do I put together an Overdose Rescue Kit?

## **An intranasal naloxone kit must include:**

- 2 doses of intranasal naloxone
- 2 mucosal atomizer devices (nose pieces)
- 1 face mask for rescue breathing
- 1 pair of latex gloves

## **An injectable naloxone kit must include:**

- 2 vials (each vial is 1 dose) of naloxone
- 2 intramuscular syringes
- 1 face mask for rescue breathing
- 1 pair of latex gloves
- 2 alcohol prep pads

## **In addition, we recommend you include:**

- 1 yellow “Prevent Drug Overdose” palm card, available in English and Spanish
- Graphic instruction sheet by HRC on how to put together intranasal naloxone (for the intranasal kits only), available in English and Spanish

*NOTE: Before distributing a kit, make sure that the naloxone has not expired!* Expiration dates are printed on the end of the box of the intranasal dose, and on the label of the bottle of the injectable dose. If the naloxone will expire within the next 6 months, do not dispense it. Order a new supply.
