Compounding for Otolaryngology

When talking with doctors in the field of Ear, Nose & Throat, I am always asked, "What specifically can you make for us in your compounding pharmacy?" So, I have made a list of compounds relevant to your specialty. This is not everything we can do, our compounding database has thousands of formulas, but I hope it is a good starting place for us. We pride ourselves in being the medicinal problem solvers so that together we can better improve the quality of life for patients. This service is designed to create medications and tailor them to the specific needs of individual patient.
